

HW EXHIBITS

May 21, 2019

To Whom It May Concern,

In 2018, HW Exhibits contracted Daruma Tech to help us develop an interactive learning kiosk for Marine Recruits. Daruma helped us to define the scope of work and determine exactly what we would need to complete the project. They quickly responded with a clear project approach and a reasonable fee.

Throughout the project Daruma quickly responded to questions and helped to ensure our product was easy to use and intuitive. Their knowledgeable staff provided key insights into the programming process and worked seamlessly with our design team. Daruma helped us to determine the correct hardware to use for the kiosk, based on the expected visitor interaction and software.

I would highly recommend Daruma Tech. They were easy to work with and quickly incorporated client feedback. They produced a high quality and user-friendly product that is perfect for an educational interactive in a museum. I look forward to working with their team again!

Sincerely,

Rachel Bragg
